LINGVESSA

# Curriculum Blueprint A1

## English + Čeština / version 1.6

Normative curriculum architecture for two launch languages: A1 outcomes, module sequence, lesson pattern, two-level mastery, review, assessment, optional AI learning support, media and production quality.

**COURSE PATHS  ENGLISH en-GB / en-US + ČEŠTINA cs-CZ**
**EXPLANATION LANGUAGE  UKRAINIAN uk-UA**
**A1 ARCHITECTURE  12 MODULES x (4 LESSONS + 1 RECAP) PER LANGUAGE**
**MASTERY  6 GLOBAL SKILLS + KNOWLEDGE-ITEM FACETS**
**AI  OPTIONAL, GROUNDED, NON-CRITICAL TO CORE COURSE**

BASELINE  FORMAL v1.7 / TECHNICAL v1.7 / TECHNICAL DESIGN v1.7 / CURRICULUM A1 v1.6 / REFERENCE v1.6 / AI v1.4 / PLAN v1.4

**Status: OWNER-LOCKED IMPLEMENTATION BASELINE**

Owner lock: 10 September 2026 | Document version date: 09.09.2026 | Replaces Curriculum Blueprint A1 v1.5

# Паспорт документа

| Поле | Значення |
|---|---|
| Ідентифікатор | LINGVESSA-CURR-A1 |
| Версія / дата | 1.6 / 09.09.2026 |
| Статус | OWNER-LOCKED IMPLEMENTATION BASELINE; owner lock 10.09.2026; P0 authorized. |
| Замінює | Curriculum Blueprint A1 v1.5; previous versions remain historical. |
| Залежності | Formal Specification v1.7; Technical Specification v1.7; Technical Design v1.7; Curriculum Blueprint A1 v1.6; Reference Module Design v1.6; AI Integration Specification v1.4; Implementation Plan v1.4 (execution order only). |
| Аудиторія | Власник продукту, методист, автор контенту, лінгвістичний редактор, media/voice team, AI/content tooling, QA, розробник. |
| У межах | English A1 та Čeština A1; module maps, lesson briefs, recap, review, two-level mastery, pronunciation UX, optional AI learning support, optional A1 Level Test blueprint. |
| Поза межами | Повний production text усіх уроків, готові assets, зовнішня CEFR certification, A2-C1 curriculum, paid/commercial AI policy. |

## Що змінено у v1.6

| Зміна | Результат |
|---|---|
| Product identity | Документ синхронізовано з робочою назвою Lingvessa. |
| Dependencies | Formal v1.7, Technical v1.7, Technical Design v1.7, Reference v1.6 та AI Integration v1.4 є governing baseline. |
| Pronunciation | Повернуто learner-facing correct / try again для usable speech. Low confidence, mic denial і provider failure = neutral speech_unavailable; без hard gate або штрафу. |
| Mastery | Зафіксовано дворівневу модель: 6 глобальних skill projections + детальні knowledge-item facets. |
| Result UX | Після кожного lesson не вимагається показувати всі 6 skills. Lesson result показує доречний progress/mistakes; повний profile живе у Progress. |
| AI learning | Додано optional grounded AI layer: personalized explanation, adaptive hints, extra practice, writing feedback, bounded conversation/role-play. Core curriculum працює без AI. |
| AI evidence | Free-form AI practice не змінює mastery напряму; evidence можливе лише через затверджений evaluator/rubric/template. |
| Production order | Reference implementation є production-oriented; додатковий throwaway one-folder prototype не є обов’язковим кроком. |
| Reference Modules | E-A1-M01 і C-A1-M01 залишаються design/regression references; Reference Module Design v1.6 вже синхронізований з цим baseline. Future changes require controlled curriculum/reference revision. |

# Зміст

1. Призначення, межі та нормативність
2. A1 exit profile та CEFR alignment
3. Спільна архітектура A1
4. Методичні принципи
5. Нормативний lesson blueprint
5.1. Exercise progression and controls
5.2. Optional AI learning layer
6. Лексична модель і knowledge coverage
6.1. Knowledge item types
7. English A1 module map
7.1. English grammar scope control
8. English Reference Module status
9. Čeština A1 module map
9.1. Čeština grammar scope control
10. Čeština Reference Module status
11. Pronunciation blueprint
11.1. Slow audio and voices
12. Review, two-level mastery and spiral recycling
12.1. Global skills and knowledge-item facets
13. Module Recap and Optional A1 Level Test
14. Media blueprint
14.1. Asset pipeline
15. AI learning blueprint
15.1. AI evidence and learner safeguards
16. Content production gates
16.1. Authoring package per module
17. Cross-language requirements
18. Normative requirements and acceptance
19. Definition of Done, decisions and next production stage
20. Sources and change control

# ЧАСТИНА A. РАМКА РІВНЯ

## 1. Призначення, межі та нормативність

Blueprint переводить продуктову й технічну специфікації Lingvessa у навчальну архітектуру A1. Він визначає, що користувач має вміти, у якій послідовності розвиваються знання й уміння, які докази приймаються для mastery та які артефакти потрібні для production. Це не збірник готових уроків і не обіцянка автоматичної зовнішньої сертифікації CEFR.

**Ключове рішення**
English і Čeština є двома стартовими target languages. Вони використовують спільні Lesson Engine, Review Engine, Mastery Engine, Media Pipeline та optional AI capability layer, але мають окремі curriculum versions, language profiles, progress, mastery/review state і language-specific pedagogy. Review або AI context однієї мови не може випадково змішуватися з іншою.

- Усі модулі, examples, dialogues, explanations, activities, visual assets і audio scripts мають бути оригінальними або належно ліцензованими; не копіювати Babbel чи інший комерційний курс.
- Навчальна ціль формулюється як реальна дія користувача (can-do); граматика, лексика, pronunciation і strategy є засобами цієї дії.
- Кожен module завершується Module Recap у новій ситуації. Recap не є повтором тих самих screens.
- Optional A1 Level Test оцінює внутрішню readiness і не блокує доступ до A2.
- AI є optional learner assistance/practice. Відсутність AI не блокує lesson, recap, review, Level Test або progression.

**Нормативні слова**
MUST - обов'язково для приймання; SHOULD - очікувана практика, відхилення потребує обґрунтування; MAY - дозволений варіант. При конфлікті діє пізніше зафіксоване рішення власника продукту; документ оновлюється controlled revision.

## 2. A1 exit profile та CEFR alignment

A1 у Lingvessa є збалансованим профілем, а не одним сумарним балом. Course completion означає проходження content path; A1 readiness означає достатній внутрішній evidence profile; зовнішній сертифікат може видати лише уповноважена екзаменаційна організація.

| Outcome ID | Наприкінці A1 користувач може | Тип доказу |
|---|---|---|
| A1-OUT-01 | Зрозуміти знайомі слова, короткі фрази, інструкції та оголошення за чіткої й переважно повільної подачі. | Listening gist/detail; action selection; short response |
| A1-OUT-02 | Прочитати дуже короткі signs, menu/timetable, form labels, особисті та practical messages. | Reading selection; information extraction |
| A1-OUT-03 | Привітатися, представитися, обмінятися простими особистими даними й попросити clarification. | Prompted dialogue; typed or spoken turn |
| A1-OUT-04 | Виконати базові transactions у кафе, магазині, транспорті, житлі, сервісах і pharmacy context. | Goal-oriented scenario with at least two turns |
| A1-OUT-05 | Сказати простими фразами про сім'ю, житло, рутину, вподобання, стан, місце, просту минулу подію та найближчий план. | Short oral or written production |
| A1-OUT-06 | Заповнити базові personal fields і написати дуже коротке повідомлення або відповідь. | Form completion; short writing |
| A1-OUT-07 | Передати просту передбачувану інформацію іншій людині, коли слова й контекст знайомі. | Simple relay/mediation micro-task |
| A1-OUT-08 | Бути зрозумілим у підготовлених A1 ситуаціях; використовувати repair strategies, replay і clarification без штрафу за accent difference. | Intelligibility sample; interaction strategy evidence |

**Alignment, не сертифікація**
Кожний module outcome має trace link до одного або кількох A1-OUT IDs і релевантних CEFR descriptor families. AI-generated feedback або внутрішній Level Test не перетворюють readiness estimate на офіційну сертифікацію.

## 3. Спільна архітектура A1

| Рівень | На одну мову | Для двох мов | Правило |
|---|---|---|---|
| Modules | 12 | 24 | Одна велика життєва situation/domain; versioned prerequisite order |
| Core lessons | 48 (12 x 4) | 96 | Кожен lesson має один primary communicative objective |
| Module Recaps | 12 | 24 | Нова інтегрована situation + material from all four lessons + prior modules |
| A1 Level Test | 1 optional blueprint | 2 language-specific forms | Readiness estimate; не gate до A2; thresholds after calibration |
| Total learning units | 60 + optional test | 120 + 2 optional tests | Review та AI practice adaptive; не рахуються як fixed lessons |

### 3.1. Прогресія модулів

Default path є послідовним M01 -> M12. Доступ до наступного module MAY бути відкритий раніше, але recommendation logic спершу пропонує due review і prerequisite gaps. Нова curriculum version не переписує historical attempts; вона створює versioned mapping і migration decision.

| Фаза | Модулі | Основний розвиток |
|---|---|---|
| Early A1 | M01-M03 | identity, classroom survival, people, numbers, time, routine; high scaffolding |
| Core A1 | M04-M08 | transactions, place, movement, shopping, food, invitations; guided -> independent retrieval |
| Late A1 | M09-M12 | weather/current action, health, practical messages, controlled past/future integration |
| A1 -> A2 bridge | Within M12 + optional test | limited transfer beyond rehearsed chunks; no full A2 grammar expansion |

# ЧАСТИНА B. НАВЧАЛЬНА КОНСТРУКЦІЯ

## 4. Методичні принципи

| Принцип | Реалізація | Evidence in content |
|---|---|---|
| Action-oriented | Module організовано навколо реальної задачі, не списку forms. | Can-do + integrated scenario + outcome mapping |
| Scaffolding | Support зменшується: noticing -> recognition -> guided retrieval -> independent production. | Hint/support level metadata |
| Spiral learning | Knowledge повертається у новій функції та context. | recycles_item_id / prerequisite links |
| Retrieval practice | Кожен lesson містить хоча б одну спробу без повної опори. | attempt evidence before reveal |
| Interleaving | Recap і review змішують items, operations та skills без хаотичності. | mixed blueprint across lessons/modules |
| Guided discovery | Grammar/morphology виводиться з context, потім коротко пояснюється українською. | example set + noticing prompt + concise rule |
| Multimodality | Text, audio, visual, speaking and typing використовуються лише коли підтримують objective. | modality rationale + accessible alternative |
| Learner autonomy | Replay, slow audio, reveal, collections, AI assistance and level test не карають користувача. | controls + non-blocking paths |
| AI grounding | AI пояснює/практикує тільки на основі approved knowledge/content і не замінює curricular truth. | grounding_refs + capability policy |

## 5. Нормативний lesson blueprint

**Обов’язкова послідовність сенсу**
Context -> input/noticing -> concise Ukrainian explanation -> controlled practice -> active retrieval -> listening/communication -> result/remediation. Не кожен screen реалізує всі стадії, але lesson як ціле MUST мати context, active retrieval і visible result.

| Unit | Primary role | Typical activity mix | Minimum evidence |
|---|---|---|---|
| L1 | Context + lexical/chunk core | scene/audio grounding; recognition; short listening; first retrieval | lexical recognition + one unassisted recall |
| L2 | Structure discovery | examples; noticing; concise explanation; controlled choice/gap fill; retrieval | functional grammar or morphology in context |
| L3 | Reception + transfer + pronunciation | new dialogue/text; gist/detail; classification; listen/repeat; contrast | listening/reading evidence + pronunciation exposure |
| L4 | Production + interaction | dialogue chain; word builder; typing/writing; speaking alternative; integrated micro-task | at least one active production attempt |
| Recap | New scenario + integration | mixed warm-up; multi-step scenario; result; error remediation | coverage from all four lessons and prior module |

### 5.1. Exercise progression and controls

| Stage | Permitted examples | Rule |
|---|---|---|
| First exposure | image/scene, audio, word/chunk, micro-translation, usage note | Do not overload with simultaneous new form, meaning and distractors |
| Recognition | multiple choice, image choice, matching, classification | Distractors plausible but unambiguous |
| Guided retrieval | gap fill, word builder, sentence order, morphology choice | Hint level explicit metadata |
| Independent retrieval | full typing, L1->L2 recall, short response | Accepted variants language-aware/versioned |
| Listening transfer | gist/detail, dialogue completion, announcement | Transcript hidden before first evidence unless accessibility requires |
| Production | read aloud, role-play, short writing, prompted interaction | Speech has non-mic continuation; usable speech may show correct/try again |
| Delayed review | adaptive mix by due/weak/error state | No cross-language candidate mixing |

**Retry, Reveal, Next і speech**
Для scored activity Next доступний після correct або conscious Reveal. Reveal не створює independent mastery й прискорює review. Для speech: mic починає pulsing/recording only after explicit action; usable result may show correct / try again. Low confidence, mic denial або provider failure = speech_unavailable, neutral and non-blocking. Auto-advance допускається лише з allowed completion state.

### 5.2. Optional AI learning layer

AI не є обов'язковою стадією lesson. Він може з'являтися як contextual assistance або additional practice там, де це додає цінність і не руйнує deterministic core flow.

| AI capability | A1 pedagogical role | Default rule |
|---|---|---|
| Пояснити інакше / Чому тут так? | Коротке grounded пояснення українською з 1-2 простими examples. | Published knowledge/content refs required; no mastery by viewing. |
| Adaptive hint | Перефразувати або вибрати hint у межах hint_policy. | Не reveal answer раніше policy; hint = assistance evidence. |
| Extra practice | Створити додаткову коротку вправу на weak skill/facet. | Free-form = practice-only; deterministic validated template may add bounded evidence. |
| Writing feedback | 1-2 highest-value corrections at A1; meaning/form/vocabulary/register separated. | Advisory unless calibrated rubric/evaluator approved. |
| AI role-play | Bounded scenario with short turns and module goal. | Optional; scripted fallback always available; not an unrestricted chatbot by default. |

**Core guarantee**
AI disabled, unavailable, rate-limited or out of free quota must not block core lesson, Recap, Review, Level Test or course progression. The non-AI path remains complete.

## 6. Лексична модель і knowledge coverage

Лексичний обсяг рахується як lexical units: окремі meanings, chunks, formulae та high-frequency micro-phrases, а не лише lemmas. Полісемічне слово не отримує повне mastery через один surface без конкретного meaning/function.

| Шар | Design target на мову | Правило застосування |
|---|---|---|
| Active core | ~800-1000 lexical units | Recognition для core items; productive evidence лише там, де це потрібно outcome |
| Receptive extension | ~250-400 units | Reading/listening із context support; не вимагати однакового productive mastery |
| Chunks / formulae | не менше 25-30% active core | Зберігати як units, якщо функція не складається надійно з окремих слів на A1 |
| Recycled items | 100% core mapped | Кожен core item має immediate, module або cross-module revisit plan |

**Це planning targets**
Числа не є CEFR-нормою і не доводять рівень самі по собі. Вони калібруються після authoring, pilot data, coverage audit і linguistic review.

### 6.1. Knowledge item types

| Тип | Приклад | Required links / facets |
|---|---|---|
| lexical_sense | bank = financial institution | language, variety, meaning, form, audio, module, outcome; meaning/recognition/recall/spelling |
| chunk | Can I have...? / Dám si... | function, register, accepted variants, dialogue use; production/context_use |
| grammar_pattern | there is/are; locative after v/na | function, prerequisite, examples, error tags; form/meaning/use |
| morphology_pattern | Czech gender/agreement or accusative form | lemma/features, active/receptive scope, accepted forms; morphology facet |
| pronunciation_feature | English /h/; Czech vowel length | reference audio, target contrast, speech policy; pronunciation facet |
| interaction_move | greeting, clarification, accepting invitation | scenario, turn role, repair alternative; production/context_use/register |
| orthography_feature | spelling names; Czech diacritics | input mode, tolerant/strict evaluation; spelling/orthography |

# ЧАСТИНА C. ENGLISH A1

## 7. English A1 module map

**Variant policy**
Primary path is British English (en-GB). American English (en-US) is selectable. Meaningful spelling, lexical or pronunciation differences appear as short side notes or accepted variants; the course does not duplicate every screen. Voice and answer evaluation retain variety metadata.

| ID / module | Can-do outcome | Active language focus | Lexis, pronunciation, recap |
|---|---|---|---|
| E-A1-M01<br>Hello & first contact | Привітатися, представитися, назвати країну/місто, зрозуміти classroom survival phrases. | be: I/you/he/she; subject pronouns; a/an; basic questions with be. | greetings, names, countries, languages, classroom; alphabet, spelling, /h/, vowel awareness. Recap: introduce yourself to a new classmate. |
| E-A1-M02<br>People & family | Говорити про сім'ю, вік, прості характеристики та належність. | have got; possessive adjectives; plurals; this/that/these/those. | family, age, appearance, 0-100, possessions; plural -s/-es. Recap: create a family profile. |
| E-A1-M03<br>My day & time | Розповісти про щоденну рутину, час і частотність. | Present Simple statements, negatives/questions; adverbs of frequency; at/on/in. | routine, clock time, days, activities; third-person -s, weak do/does. Recap: compare two routines. |
| E-A1-M04<br>Food & cafe | Замовити їжу/напій, назвати вподобання й прості кількості. | countable/uncountable basics; some/any; like/want; Can I have...? | food, drinks, menu, quantity, prices; word stress, polite intonation. Recap: order and resolve a missing item. |
| E-A1-M05<br>Home & neighbourhood | Описати житло, кімнати та місце предметів і nearby places. | there is/are; place prepositions; have got recycling. | rooms, furniture, neighbourhood; connected there is/are. Recap: describe a room and locate things. |
| E-A1-M06<br>Shopping & clothes | Запитати ціну/розмір, вибрати товар і сказати, що подобається. | how much/how many; demonstratives recycling; adjective+noun; object pronouns intro. | clothes, colours, sizes, money; numbers/prices, /th/ in common items. Recap: buy a basic item. |
| E-A1-M07<br>Around town & transport | Запитати/дати напрямок, купити квиток, говорити про транспорт. | can/can't; imperatives; movement/place prepositions; basic questions. | transport, directions, tickets, city places; can/can't contrast. Recap: get from a station to destination. |
| E-A1-M08<br>Free time & meeting people | Говорити про хобі, запросити, прийняти/відхилити просте запрошення. | like/love + -ing; can for ability/arrangement; would like as formulaic chunk. | hobbies, sports, cinema, dates; -ing, invitation intonation. Recap: arrange a meeting. |
| E-A1-M09<br>Weather & what's happening | Описати погоду й те, що відбувається зараз; зрозуміти короткий forecast. | Present Continuous; limited contrast with high-frequency Present Simple contexts. | weather, seasons, clothing, current actions; contractions/rhythm. Recap: choose a plan from a forecast. |
| E-A1-M10<br>Health & basic needs | Назвати симптом, попросити допомогу, зрозуміти базову рекомендацію. | have got for symptoms; imperative advice; can/can't; should receptive/formulaic bridge. | body, symptoms, pharmacy, advice; stress in symptom phrases. Recap: explain a problem at pharmacy/reception. |
| E-A1-M11<br>Work, study & digital life | Сказати, де працюєш/вчишся, виконати базовий phone/online exchange. | Present Simple recycling; object pronouns; question words; possessives. | jobs, study, phone/email, digital actions; spelling and clarification. Recap: leave/read a short message. |
| E-A1-M12<br>Yesterday, tomorrow & travel | Розповісти про дуже просту минулу подію та найближчий travel plan. | was/were; high-frequency Past Simple; controlled intention/arrangement as A1->A2 bridge. | travel, stay, yesterday/tomorrow; -ed awareness, common irregulars, announcements. Recap: arrival/stay scenario. |

### 7.1. English grammar scope control

| Stage | Active grammar | Receptive / formulaic / deferred |
|---|---|---|
| Early A1 | be; subject pronouns; a/an; have got; possessives; plurals; demonstratives | common polite formulae |
| Core A1 | Present Simple; do/does questions; adverbs; some/any; there is/are; place prepositions | fixed phrases outside active grammar target |
| Late A1 | can/can't; imperatives; like + -ing; Present Continuous; object pronouns; was/were; selected simple past | should and future expressions only as controlled bridge |
| A1->A2 bridge | limited present/past/current-action contrast and simple plan language | full future system, broad irregular past and complex aspect remain A2+ |

## 8. English Reference Module status

E-A1-M01 remains the design reference
Reference Module Design v1.6 defines the current implementation fixture. Curriculum v1.6 defines the governing mastery, pronunciation and AI boundaries; the Reference Module Design v1.6 is synchronized and governs executable fixtures these contracts before implementation approval.

| Unit | Locked function | Required coverage |
|---|---|---|
| L1 | Greetings and classroom-survival input | Hello / Hi / Good morning/evening / Goodbye/Bye; Thank you / Sorry / I don't understand / Can you repeat, please?; audio grounding; recognition + first recall; /h/ listen-and-repeat may occur here. |

| Unit | Locked function | Required coverage |
|---|---|---|
| L2 | be and identity structure in context | I am / you are / he is / she is; contractions; subject pronouns; a/an + simple roles; short introductions; Ukrainian explanation; listening detail. |
| L3 | Origin questions, listening and spelling transfer | countries/cities; Where are you from? / Are you...? + short answers; city/name spelling support; at least two voices; gist/detail; typed and optional spoken origin response. |
| L4 | Guided first-contact production | name + origin + Nice to meet you; dialogue chain; fictional profile; typed response; optional speaking; accepted contractions/punctuation variants. |
| Recap | Integrated first-contact recap | new scene; greetings/repair + be/roles + name/origin/spelling + listening + production; result/remediation. |

- Evaluation accepts meaningful en-GB/en-US variants by activity configuration; it does not silently mix voice varieties.
- Contractions and uncontracted forms are knowledge-aware variants, not blanket string normalization.
- Pronunciation usable evidence may show correct/try again; unavailable speech is neutral and never the only completion route.
- Every required media object is pre-generated, versioned and linked by asset_id before publish.
- AI support in M01 is optional and must use approved E-A1-M01 knowledge/content as grounding.

# ЧАСТИНА D. ČEŠTINA A1

## 9. Čeština A1 module map

**Language-specific principle**
Čeština не викладається як “English with different words”. Gender, agreement, case meanings, conjugation, vowel length, initial stress, clitic placement awareness and motion verbs enter through functionally limited, high-frequency contexts. Full paradigms are not the starting point.

| ID / modul | Can-do outcome | Active language focus | Lexis, pronunciation, recap |
|---|---|---|---|
| C-A1-M01<br>Dobrý den! | Привітатися, представитися, сказати, звідки ти, зрозуміти базові survival phrases. | být; osobní zájmena; nominativ; basic gender recognition. | pozdravy, jméno, země, jazyk, 0-20, classroom; initial stress, vowel length, diacritics, ř awareness. Recap: Krátké seznámení. |
| C-A1-M02<br>Lidé a rodina | Говорити про сім’ю, вік, прості характеристики та належність. | mít; possessives; nominative adjective agreement; plural awareness. | rodina, věk, lidé, appearance, 0-100; long/short vowels and consonant contrasts. Recap: Rodinný profil. |
| C-A1-M03<br>Můj den a čas | Описати простий день, сказати час, дні та регулярність. | present conjugation patterns; negation; reflexive verbs; frequency adverbs. | routine, clock, days, work/study; endings, rhythm, se placement awareness. Recap: Porovnat dva denní režimy. |
| C-A1-M04<br>Jídlo a kavárna | Замовити їжу/напій, сказати, що хочеш/любиш, зрозуміти ціну. | accusative singular in frequent patterns; chtít, jíst, pít; Dám si...; Chtěl/a bych... as chunk. | food, drinks, menu, quantities, prices; vowel length and polite intonation. Recap: Objednávka v kavárně. |
| C-A1-M05<br>Bydlení a kde co je | Описати житло й місце предметів/місць. | locative singular after v/na; controlled genitive place patterns after do/z/od/u; je/jsou. | rooms, furniture, addresses, nearby places; v/ve, z/ze linking. Recap: Popsat byt a okolí. |
| C-A1-M06<br>Město a doprava | Запитати/зрозуміти напрямок, сказати, як ідеш/їдеш, купити квиток. | jít/jet vs chodit/jezdit; imperatives; instrumental as means in core phrases; motion prepositions. | transport, directions, tickets, city places; motion-verb contrasts and consonant clusters. Recap: Dostat se z nádraží na místo. |
| C-A1-M07<br>Nakupování a oblečení | Запитати ціну/розмір, вибрати товар і назвати колір/характеристику. | accusative recycling; adjective agreement in frequent nominative/accusative patterns; demonstratives. | clothes, colours, sizes, money; numbers/prices and long vowels. Recap: Koupit oblečení. |
| C-A1-M08<br>Volný čas a domluva | Говорити про хобі, можливість/обов’язок, домовитися про зустріч. | moct/muset/chtít + infinitive; dates/time; infinitive functions. | hobbies, sport, culture, invitations, calendar; modal forms and question intonation. Recap: Domluvit schůzku. |
| C-A1-M09<br>Počasí a plány | Описати погоду та прості плани на найближчий час. | future: budu + infinitive; future motion půjdu/pojedu; time expressions. | weather, seasons, plans, clothing; future forms and rhythm. Recap: Vybrat plán podle počasí. |
| C-A1-M10<br>Zdraví a základní potřeby | Назвати симптом, попросити допомогу, зрозуміти інструкцію. | bolí mě; je mi... chunks; modal recycling; positive/negative imperatives. | body, symptoms, pharmacy, emergency basics; palatal consonants, symptom stress. Recap: V lékárně / u recepce. |
| C-A1-M11<br>Práce, studium a služby | Сказати, де працюєш/вчишся, зробити базовий phone/service exchange. | present and place-case recycling; object patterns as chunks; basic formal address. | jobs, education, phone/email, services; spelling names, vykání, clarification. Recap: practical message or phone call. |
| C-A1-M12<br>Včera a cesta | Розповісти про просту минулу подію та інтегрувати present, past і near future. | past tense; high-frequency perfective/imperfective distinction; future recycling; basic auxiliary/reflexive word order. | travel, stay, yesterday/tomorrow, past actions; endings and weak jsem/jsi. Recap: arrival and short account of yesterday. |

### 9.1. Čeština grammar scope control

| Stage | Active focus | Scope control |
|---|---|---|
| Early A1 | být, mít, present forms, nominative, gender, basic adjective agreement | мінімум метамови; chunks and pattern recognition |
| Core A1 | accusative sg.; locative sg. after v/na; controlled genitive place patterns; modal verbs; infinitive; reflexives | cases tied to co?, kde?, kam?, odkud? before full tables |
| Late A1 | jít/jet/chodit/jezdit; instrumental as means; future; imperatives; past | only frequent motion/aspect pairs required productively |
| A1->A2 bridge | basic aspect distinction and broader word-order awareness | full case paradigms, broad plural declension and systematic aspect expansion remain A2+ |

## 10. Čeština Reference Module status

C-A1-M01 remains the Czech architecture test
Reference Module Design v1.6 remains the current fixture for Czech morphology, diacritics, register and pronunciation. Reference Module Design v1.6 is synchronized and governs the new mastery facets, speech UX and optional AI assistance without creating an English-specific workaround.

| Unit | Locked function | Required coverage |
|---|---|---|
| L1 | Pozdravy, register and classroom-survival input | Dobrý den / Ahoj / Na shledanou + Děkuji / Prosím / Promiňte; formal/informal classification; repair phrases; first-syllable stress perception; first recall; listen-and-repeat. |
| L2 | být and identity patterns | jsem/jsi/jste/je; ty/vy; pronoun omission; basic role/gender lexical pairs; name/role introductions; Ukrainian explanation; listening detail; intelligibility practice. |
| L3 | Origin, language, diacritics and reception transfer | countries/cities/languages; Odkud jste?/Odkud jsi? + z/ze origin chunks; diacritics; numbers 0-20 support; gist/detail; typed and optional spoken origin response. |
| L4 | Krátké seznámení and social close | Těší mě / Mě také; formal/informal dialogue branches with name + origin; diacritics typing; fictional profile; optional speaking with register-consistent responses. |
| Recap | Integrated first-contact recap | new scene; greetings/repair + být/register + name/origin/language + listening + production; result/remediation. |

- Missing diacritic may be a form/orthography error without erasing meaning evidence.
- Accepted word order is pattern-aware; evaluator does not reduce Czech to English token order.
- Formal/informal address is explicit content metadata.
- Pronunciation focuses on intelligibility and salient contrast, not imitation of one speaker.
- AI explanation/hints for Czech MUST ground on approved morphology/register rules and preserve cs-CZ forms.

# ЧАСТИНА E. ПОВТОРЕННЯ, ОЦІНЮВАННЯ, SPEECH ТА MEDIA

## 11. Pronunciation blueprint

| English A1 | Čeština A1 | Shared UX and evidence rule |
|---|---|---|
| alphabet/spelling; salient vowel contrasts; plural/third-person endings; contractions; can/can't; -ing; common -ed awareness; sentence stress | initial stress; vowel length; diacritics; ř awareness; palatal consonants; clusters; v/ve and z/ze; auxiliary/reflexive placement awareness | reference audio; normal/slow; multiple voices; mic pulse; usable speech -> correct/try again; unavailable -> neutral fallback; non-mic continuation |

**Binary feedback, not binary gate**
A usable speech result MAY produce a simple learner-facing correct / try again state. It MUST NOT be treated as definitive language judgment when confidence is low. Mic denial, timeout, low confidence or provider failure become speech_unavailable and create no negative Speaking/Pronunciation evidence. Raw scores need not be shown.

- Mic permission is requested just in time after explicit learner action; active recording may pulse/animate and MUST respect reduced-motion.
- Correct pronunciation state may expose "Далі" or allow Auto-advance according to activity policy.
- Try-again/error state gives a short target-feature cue when evaluator evidence is usable; retry and/or controlled continuation follow the activity contract.
- AI may explain a structured target-feature issue only when the speech subsystem supplies usable evidence; AI does not invent a pronunciation diagnosis.

### 11.1. Slow audio and voices

- Relevant word, sentence and dialogue players provide normal and slow playback with pitch preservation where technically possible.
- A separately recorded slow asset MAY be used when playback-rate reduction distorts the pedagogical target.
- Every audio asset stores language, variety, speaker/voice_id, script version, speed, rights/provenance and transcript.
- Dialogues use multiple voices where roles differ; avatar, speaker label and voice_id stay synchronized.

## 12. Review, two-level mastery and spiral recycling

| Mechanism | Blueprint rule | Stored evidence |
|---|---|---|
| Immediate recycling | New item reappears in a different cognitive operation in the same/next lesson. | knowledge ID, operation, support, result, target skill/facet |
| Module recycling | Recap covers all four lessons + selected prior dependency. | coverage map + attempts |
| Cross-module recycling | New module deliberately reuses prior lexical/grammar/chunk core. | recycles_item_id links |
| Adaptive review | Due, weak and error items prioritized within active target language. | versioned scheduling reason |
| Reveal handling | Reveal permits continuation but is not independent success. | revealed=true + assistance/evidence rule version |
| Error remediation | Unresolved scored mistakes enter separate loop; lapse history immutable. | attempt history + mistake/remediation state |
| AI assistance | AI explain/hint/practice is optional; AI usage does not by itself prove mastery. | grounding refs + capability + assistance/provenance metadata |

### 12.1. Global skills and knowledge-item facets

Mastery is explicitly two-level. Global skills are learner-profile projections; item facets record what the learner can actually do with a specific knowledge item. The same attempt may update one or more exact targets, but no UI percentage replaces the underlying evidence.

| Layer | Dimensions / facets | Examples of qualifying evidence |
|---|---|---|
| Global skills | Vocabulary, Grammar, Listening, Speaking, Writing, Pronunciation | Aggregated, uncertainty-aware projections from relevant item evidence. |
| Lexical/item facets | meaning, recognition, recall_l2_to_l1, recall_l1_to_l2, spelling, production, listening_recognition, context_use, register | Meaning choice; delayed recall; dictation; spoken/typed production; new-context use. |
| Language-specific facets | register, morphology, orthography, collocation, variant_awareness as relevant | Czech ty/vy, case form, diacritics; English contraction/variety choices. |
| Evidence quality | independent vs assisted, attempts, difficulty, freshness, response context | Reveal/hint/AI assistance lowers or removes independent evidence; low-confidence speech gives none. |

**Result UX**
A lesson result does not need to display six separate scores every time. It SHOULD show completion, unresolved mistakes/remediation and concise relevant progress. The full six-skill profile and detailed weak areas are available in Progress/Review surfaces.

## 13. Module Recap and Optional A1 Level Test

### 13.1. Module Recap

- Starts with a short retrieval warm-up and moves to a new integrated situation.
- Combines listening, lexical recall, grammar/morphology function, typing/writing and at least one productive/dialogue activity.
- Covers all four module lessons and selected prior-module items; does not repeat the same screens.
- Shows outcome progress, mistakes and recommended review; unresolved scored items enter remediation.
- Speech unavailable or AI unavailable cannot make Recap impossible to complete.

### 13.2. Optional A1 Level Test

| Area | Minimum evidence family | Scoring rule before calibration |
|---|---|---|
| Listening | short everyday messages, announcements and dialogue turns | separate subscore; no transcript before response unless accessibility |
| Reading | signs, menu/timetable, forms, short personal/practical messages | assessment-only subscore; item evidence maps to Vocabulary/Grammar facets, not a seventh global skill |
| Grammar + vocabulary | functional use inside context | supporting evidence, not isolated terminology |
| Writing | very short practical/personal response | versioned rubric/accepted variants; AI feedback advisory unless calibrated evaluator approved |
| Speaking | short self-introduction + prompted interaction | non-mic alternative collection path; speech unavailable = insufficient evidence, not failed |
| Pronunciation | intelligibility-focused sample | reported separately; no accent imitation gate |

**No invented pass mark**
Coverage and evidence are defined now; final readiness bands require pilot data, item analysis and expert review. AI-generated judgment or LLM confidence MUST NOT become the pass threshold.

## 14. Media blueprint

**User responsibility**
The learner does not create or search for required images, voices or dialogue audio. Required course media is pre-generated/programmatic or properly licensed, QA-reviewed and linked through asset_id before publish. Live generation is not a dependency of a normal attempt.

| Asset class | Use | Manifest and QA minimum |
|---|---|---|
| Vocabulary image | concrete nouns/actions | one clear concept; no unintended text; rights/provenance; alt/decorative flag |
| Scene image | dialogue/situation grounding | context without answer giveaway; cultural review; consistent characters |
| Character/avatar | recurring dialogue roles | character profile; expression set; synchronized speaker + voice_id |
| Concept illustration | abstract grammar/usage when useful | objective rationale; accessible explanation; no decorative overload |
| Word/sentence audio | relevant lexical/sentence items | language/variety; script; speaker; normal/slow; transcript; rights |
| Dialogue audio | multi-speaker scenes | turn timing; labels; transcript; loudness/noise QA; avatar sync |

### 14.1. Asset pipeline

curriculum_version -> lesson brief -> media_requirement -> prompt/script specification -> generation/licensing -> language/media/accessibility QA -> rights/provenance record -> storage -> asset_id -> content version -> publish

Czech scenes do not simulate “Czechness” through stereotypes. Local context is used only when it supports the communicative goal: address formats, transport, services, shops, place names or social register.

# ЧАСТИНА F. OPTIONAL AI LEARNING BLUEPRINT

## 15. AI learning blueprint

AI in Lingvessa A1 is a bounded, grounded extension of the curated curriculum. It does not replace the lesson sequence, the knowledge graph, deterministic answer policies or human-authored reference content. AI learner functions may be enabled per capability and must always expose a complete non-AI fallback.

| Capability | Grounding/context | A1 behavior | Fallback |
|---|---|---|---|
| Personalized explanation | current knowledge_item, approved explanation/usage notes, language/variety, CEFR, minimal mistake context | short Ukrainian explanation; 1-2 examples; no unnecessary metalinguistic complexity | curated explanation + examples |
| Adaptive hint | activity hint_policy, target item/facet, support level | choose/phrase a hint without revealing full answer before policy permits | deterministic stored hint/reveal |
| Extra practice | weak item IDs/facets, operation target, approved template/rules | short additional practice; limited novelty; clear practice-only status if free-form | standard Review queue |
| Writing feedback | learner response, task/rubric, approved language rules | task completion, meaning, form, vocabulary/chunks, register, spelling; 1-2 highest-value fixes | deterministic checks + model answer |
| AI conversation | module goal, permitted knowledge range, character/register, correction mode | short scenario-bounded turns; guided text by default at A1; optional voice via speech stack | scripted dialogue/role-play from module |
| Pronunciation explanation | usable structured speech result + target feature | brief explanation of specific feature only; no invented diagnosis | reference audio + deterministic speech feedback |

### 15.1. AI evidence and learner safeguards

| AI signal | Default evidence effect |
|---|---|
| AI explanation viewed | No positive mastery by itself. |
| AI hint used | Assistance metadata; does not equal independent retrieval. |
| Free-form AI practice answer | Practice-only; no direct mastery. |
| Template-constrained AI surface + deterministic evaluator | MAY create bounded evidence to exact global skill + item facet after validation. |
| AI writing feedback | Advisory; no direct mastery unless calibrated rubric/evaluator approved. |
| AI conversation text turn | May count as production/interaction only through approved rubric/evaluator; not automatic. |
| Voice turn | Speaking/Pronunciation evidence only through usable speech subsystem evidence; unavailable = none. |

- Grounding refs and exact content/knowledge versions are retained where relevant.
- Learner context sent to AI is minimized; no broad export of account/history.
- AI must preserve English variety, Czech morphology/diacritics/register and approved accepted variants.
- If AI is contradictory, unavailable or uncertain, Lingvessa falls back to curated content instead of inventing a rule.
- AI-generated content is not automatically published course content; published material continues through content QA workflow.

# ЧАСТИНА G. PRODUCTION GOVERNANCE

## 16. Content production gates

| Gate | Must pass before publish | Blocking examples |
|---|---|---|
| Curriculum QA | can-do, prerequisite fit, A1-OUT trace, spiral links, scope plausibility | unmapped outcome; A2 structure required as core |
| Language QA | natural wording, morphology/grammar, translation, register, en-GB/en-US or cs-CZ policy | unnatural answer; wrong case; mixed variety |
| Activity QA | objective fit, answer uniqueness, variants, retry/reveal/next, no dead end | two valid answers but one accepted; reveal counted as success |
| Pronunciation QA | script/audio alignment, target salience, correct/try-again policy, neutral unavailable path | low-confidence result treated as definitive failure; wrong transcript |
| AI QA | grounding, level fit, capability policy, fallback, mastery effect, privacy | AI contradicts curated rule; free-form practice changes mastery; no fallback |
| Media QA | concept clarity, consistency, provenance/rights, no copied course assets | answer giveaway; missing rights record |
| Accessibility QA | keyboard/touch, focus, alt/transcript/captions, non-mic path | critical instruction only in sound/colour |
| Technical QA | schema valid, IDs resolved, version links, no missing media dependency | orphan asset_id; invalid knowledge/facet link |
| Analytics readiness | objective, item, operation, support, attempt, reveal, error category, AI capability observable | event cannot be tied to content/rule version |

### 16.1. Authoring package per module

| Artifact | Minimum content |
|---|---|
| Module brief | can-do, A1-OUT links, prerequisite/recycle plan, scope, recap scenario |
| 4 lesson briefs | objective, sequence, items, examples, accepted variants, activity mix, evidence/remediation |
| Knowledge inventory | stable IDs, type, active/receptive flag, prerequisites, module/lesson use, global skill targets + detailed facets |
| Language pack | uk-UA explanation, target prompts/answers, register/variety metadata, linguistic QA status |
| Media manifest | requirements, scripts/prompts, asset IDs, voice IDs, transcripts, alt text, provenance/rights |
| AI capability map | allowed learner AI entry points, grounding refs, hint policies, fallback, practice templates/rubrics, mastery effect |
| Assessment map | lesson evidence, recap coverage, review tags, error taxonomy, optional test link |
| Release record | content version, dependencies, QA approvals, known limitations, rollback target |

## 17. Cross-language requirements

| Requirement | English | Čeština | Shared invariant |
|---|---|---|---|
| Course identity | en-GB default; en-US selectable | cs-CZ | separate curriculum_version and language profile |
| Pedagogy config | articles, auxiliary questions, word-order emphasis | cases, agreement, diacritics, clitic awareness, motion verbs | one engine; language-specific config/strategy |
| Evaluation | contractions, spelling, variety-aware variants | morphology, diacritics, word-order/register-aware variants | versioned acceptance rules + immutable attempts |
| Mastery | English item facets | Czech item facets incl. register/morphology/orthography | same two-level model; no cross-language evidence |
| Review | English candidates only | Czech candidates only | same scheduler contract; no cross-language candidate |
| Speech/audio | British/American voice profiles | Czech voice profiles | correct/try again on usable result; neutral unavailable; normal/slow |
| AI | English grounded content/variety | Czech grounded morphology/register | same AI ports/policies; separate language context; non-AI fallback |
| Media | culture/context appropriate | culture/context appropriate | shared original/licensed pipeline, provenance/accessibility |

**Architecture validation rule**
The two Reference Modules validate the shared contracts. If Czech content or learner AI requires an English-specific workaround rather than configuration/strategy within the common model, Technical Specification/Design must be revised before full A1 production.

## 18. Normative requirements and acceptance

| ID | Вимога | Пріоритет | Критерій перевірки |
|---|---|---|---|
| CUR-A1-001 | Two independent A1 paths exist for English and Czech from launch. | MUST | Separate curriculum/profile/progress/mastery/review. |
| CUR-A1-002 | Each path contains 12 modules, 48 core lessons and 12 recaps. | MUST | Manifest totals 60 units per language. |
| CUR-A1-003 | Every module has can-do outcome mapped to A1-OUT IDs. | MUST | Coverage report no unmapped module. |
| CUR-A1-004 | Every lesson follows normative meaning sequence. | MUST | Context, active retrieval, visible result. |
| CUR-A1-005 | Core knowledge items have stable IDs/versioned dependencies. | MUST | No unresolved reference. |
| CUR-A1-006 | Active/receptive scope explicit. | MUST | Lexical/grammar item metadata complete. |
| CUR-A1-007 | Mastery is two-level: six global skills + item facets. | MUST | Evidence distinguishes e.g. meaning vs spelling vs production. |
| CUR-A1-008 | Review candidates stay within selected target language. | MUST | Cross-language isolation test. |
| CUR-A1-009 | Reveal/AI hint do not create independent mastery. | MUST | Attempt/evidence/scheduling test. |
| CUR-A1-010 | Usable speech may show correct/try again; unavailable speech is neutral and non-blocking. | MUST | Correct/mismatch/denial/low-confidence/provider-failure paths. |
| CUR-A1-011 | English variety explicit; en-GB default. | MUST | en-US variants/voices/notes configured where meaningful. |

| ID | Вимога | Пріоритет | Критерій перевірки |
|---|---|---|---|
| CUR-A1-012 | Czech grammar/evaluation works without English-only schema. | MUST | M01 + later morphology scenario. |
| CUR-A1-013 | Module Recap uses a new integrated scenario. | MUST | Coverage all four lessons + recycle links. |
| CUR-A1-014 | Optional Level Test does not block A2; readiness bands calibrated before release. | MUST | No invented threshold in config. |
| CUR-A1-015 | Required course media resolved before publish; users do not source it. | MUST | asset IDs/transcripts/rights resolve. |
| CUR-A1-016 | Content and trade dress are original. | MUST | Originality/provenance review. |
| CUR-A1-017 | Accessibility alternatives preserve objective. | MUST | Keyboard/touch/transcript/non-mic QA. |
| CUR-A1-018 | Attempts/mastery decisions retain content/evaluator/model versions. | MUST | Audit explains evidence effect. |
| CUR-A1-019 | AI learner functions are optional and grounded in approved Lingvessa content. | MUST | AI off/outage leaves full core path; grounding fixture valid. |
| CUR-A1-020 | Free-form AI practice and LLM confidence do not directly change mastery. | MUST | Evidence API rejects unvalidated AI authority. |
| CUR-A1-021 | AI writing/conversation evidence requires approved rubric/evaluator. | MUST | Practice-only default test. |
| CUR-A1-022 | Reference Modules remain regression fixtures and are synchronized before implementation approval. | MUST | EN/CS reference validation suite passes. |

## 19. Definition of Done, decisions and next production stage

### 19.1. Blueprint Definition of Done

- All 12 English and 12 Czech modules have approved can-do outcomes, A1-OUT trace links and prerequisite order.
- Each module has four lesson briefs, one integrated Recap brief and explicit recycle plan.
- Every active grammar/morphology target is tied to communicative function and knowledge IDs.
- Lexical/chunk/pronunciation/orthography/interaction targets have active/receptive scope and relevant item facets.
- English en-GB/en-US and Czech cs-CZ rules are explicit and covered by language QA.
- Media manifests can be fulfilled without manual image/audio sourcing by learner.
- Review/mastery mappings cover six global skills and detailed knowledge-item facets.
- Pronunciation UX follows usable correct/try-again + neutral unavailable contract.
- Optional AI entry points have grounding, fallback, privacy and evidence policy; core curriculum works with AI disabled.
- E-A1-M01 and C-A1-M01 remain design references/regression fixtures and are synchronized to current governing specs before implementation.
- Level Test blueprint has coverage, form versioning, rubric and calibration plan without invented pass mark.
- All CUR-A1 requirements have owner/test/review method and no unresolved release blocker.

### 19.2. Open decisions before full A1 production

| Decision | Default in v1.6 | Close before |
|---|---|---|
| Module map approval | 12-module sequence in sections 7 and 9 | authoring M02-M12 |
| Lexical target calibration | ~800-1000 active; ~250-400 receptive per language | final knowledge inventory freeze |
| Level Test readiness bands | not fixed; pilot-calibrated | test release |
| Voice cast | multiple coherent profiles per language/variety | audio batch generation |
| Speech provider/thresholds | provider-agnostic; usable result UX per Technical Design; unavailable neutral | speech production rollout |
| AI learner capabilities | personalized explain/hint first; extra practice/writing/conversation by feature flag | each capability rollout |
| AI rubric/evidence | advisory/practice-only unless validated | before any AI signal affects mastery |
| Reference Module QA | Reference Module Design v1.6 is the synchronized executable fixture; keep Curriculum and Reference lesson-level coverage aligned through controlled revision. | reference implementation start |

### 19.3. Next production stage

| Order | Work package | Exit evidence |
|---|---|---|
| 1 | Maintain Reference Module Design v1.6 as synchronized executable fixture; future changes require controlled revision. | approved reference contract; pronunciation/mastery/AI changes reflected |
| 2 | Run cross-functional QA on both Reference Modules. | signed gap list; engine/schema changes resolved/versioned |
| 3 | Freeze authoring schema, evaluator and mastery-facet contracts. | content schema version; accepted-variant policy; regression fixtures |
| 4 | Implement production-oriented bilingual reference slice (no throwaway prototype requirement). | English+Czech end-to-end implementation evidence |
| 5 | Produce/approve required media assets and optional AI capability fixtures. | resolved asset manifests; AI grounding/fallback tests |
| 6 | Author M02-M12 module briefs and knowledge inventories in both languages. | coverage/prerequisite/facet reports; language review |
| 7 | Produce lesson content/media in controlled batches; pilot core and optional AI separately. | QA-approved versions; pilot/error/drop-off report |
| 8 | Build/calibrate optional A1 Level Tests. | versioned forms, rubrics, readiness bands, limitation notice |

## 20. Sources and change control

- Council of Europe (2020). Common European Framework of Reference for Languages: Learning, teaching, assessment - Companion Volume. source
- Council of Europe. CEFR resources and the action-oriented approach. source
- English Profile. English Grammar Profile. source
- English Profile. English Vocabulary Profile. source
- NPI / Čeština pro cizince. Referenční popis češtiny pro účely zkoušky z českého jazyka pro trvalý pobyt v ČR - úrovně A1, A2. source
- Internal baseline: Lingvessa Formal Specification v1.7; Lingvessa Technical Specification v1.7; Technical Design v1.7; AI Integration Specification v1.4; Reference Module Design v1.6; Implementation Plan v1.4.

**Source use and originality**
External sources define reference levels, descriptor families and language-specific scope. They are not sources for copying proprietary lesson sequences, tasks, examples, media or trade dress. Every production artifact has internal authoring/provenance records.

| Change type | Required control |
|---|---|
| Outcome/module sequence | owner + curriculum lead approval; prerequisite/review/assessment impact documented |
| Knowledge scope/facets | language lead approval; active/receptive + migration/mastery impact recorded |
| Evaluation/pronunciation rule | language + technical QA; versioned rule; regression and historic-attempt behavior |
| AI learner capability | curriculum + AI policy + privacy/technical QA; grounding/fallback/evidence decision |
| Assessment threshold | pilot evidence, item analysis, expert approval, limitation notice |
| Media/script | content version, language/media/accessibility QA, rights/provenance refresh |

Approval record
This v1.6 is the owner-locked curriculum baseline as of 10.09.2026; implementation P0 is authorized; future changes create a controlled revision and do not overwrite curriculum history.

# Controlled baseline synchronization - 09.09.2026

Normative baseline
This document is part of the synchronized Lingvessa owner-locked implementation baseline; P0 is authorized as of 10.09.2026. Earlier current-version references are superseded by the exact set below; historical "replaces" statements remain historical only.

| Document | Version | Authority |
|---|---|---|
| Lingvessa_Formal_Specification | v1.7 | Product scope, pedagogy, user-facing invariants |
| Lingvessa_Technical_Specification | v1.7 | Normative technical requirements and interfaces |
| Lingvessa_Technical_Design | v1.7 | Concrete implementation contracts, DDL/state/API design |
| Lingvessa_Curriculum_Blueprint_A1 | v1.6 | A1 pedagogical scope and module architecture |

| | | |
|---|---|---|
| Lingvessa_Reference_Module_Design | v1.6 | Executable E-A1-M01/C-A1-M01 fixtures |
| Lingvessa_AI_Integration_Specification | v1.4 | AI-specific policy, data, routing, permissions |
| Lingvessa_Implementation_Plan | v1.4 | Sole execution-order authority; no scope override |

| Decision | Topic | Fixed rule |
|---|---|---|
| BL-001 | Baseline set | Formal 1.7 / Technical 1.7 / Design 1.7 / Curriculum A1 1.6 / Reference 1.6 / AI 1.4 / Plan 1.4 |
| BL-002 | Precedence | Domain-specific governing document controls; unresolved conflict -> owner decision + ADR/spec revision before code merge. |
| BL-003 | Identity contract | id = UUID; stable_code = immutable human-readable semantic code; version_code = immutable revision label. Never put stable_code in *_id. |
| BL-004 | Mastery contract | Exactly six global skills; canonical facet registry in this release. Reading is assessment-only domain, not seventh mastery skill. |
| BL-005 | Language isolation | Composite DB FKs/checks/trigger guards enforce user + language_profile + language lineage for learner state and learner AI. |
| BL-006 | Pronunciation states | speech_correct / speech_incorrect / speech_unavailable are canonical. Incorrect is non-blocking; Auto-advance occurs only after feedback dwell and never records success. |
| BL-007 | Speech lifecycle | Asynchronous speech_job lifecycle with idempotent final attempt settlement and transient audio cleanup. |
| BL-008 | AI API/data model | Canonical /api/v1/ai/explain\|hint\|practice\|writing-feedback\|conversations plus unified ai_* physical model. |
| BL-009 | Monorepo | One /packages/provider-adapters package with ai/, speech/, tts/, image/, email/, storage/ sub-adapters; /api-client and /ui retained. |
| BL-010 | Execution order | Implementation Plan v1.4 P0-P13 is the sole milestone numbering authority. |
| BL-011 | Learner AI opt-in | Learner AI is OFF by default until explicit opt-in/consent. Effective enablement order is global -> capability -> provider/policy -> learner setting/consent -> quota. |
| BL-012 | OpenAPI | Pin API description to OpenAPI Specification 3.1.2 for v1 baseline; upgrades require ADR/contract diff. |

Precedence: Formal controls product/pedagogical scope; Curriculum controls A1 pedagogy; Technical Specification controls normative technical requirements; Technical Design controls concrete implementation detail; AI Specification controls AI-specific behavior; Reference Module Design is the executable fixture; Implementation Plan controls execution order only. Any unresolved conflict blocks implementation until an owner decision and controlled revision/ADR.

## Canonical mastery/facet registry

Machine-code rule
Only canonical facet codes may appear in evidence_map, and every (skill, facet) pair must be allowed by the canonical matrix; invalid pairs block publish.

| facet code | Meaning |
|---|---|
| recognition | Recognition of a known form/choice |
| meaning | Meaning comprehension |
| recall_l2_to_l1 | Target-language -> explanation-language recall |
| recall_l1_to_l2 | Explanation-language -> target-language recall |
| production | Independent target-language production |
| spelling | Spelling of lexical/form surface |
| orthography | Language-specific orthographic correctness |
| listening_recognition | Recognition from audio |
| listening_gist | Gist from audio |
| listening_detail | Specific detail from audio |
| pronunciation_target | Named pronunciation feature |
| intelligibility | Understandability of learner speech |
| context_use | Appropriate use in context |
| collocation | Chunk/collocation integrity |
| grammar_form | Grammar form |

| | |
|---|---|
| word_order | Word order |
| morphology | Inflection/morphology |
| register | Register/formality |
| variant_awareness | en-GB/en-US or accepted language variant awareness |
| interaction_repair | Repair/clarification move |
| interaction_goal | Goal completion in interaction |

### Facet-to-global-skill aggregation

| Global skill | Eligible facets (only when evidence_map explicitly targets the skill) |
|---|---|
| Vocabulary | recognition, meaning, recall_l2_to_l1, recall_l1_to_l2, production, spelling, context_use, collocation, variant_awareness, register |
| Grammar | grammar_form, morphology, word_order, register, context_use |
| Listening | listening_recognition, listening_gist, listening_detail, meaning |
| Speaking | production, context_use, register, interaction_repair, interaction_goal, intelligibility |
| Writing | production, spelling, orthography, grammar_form, context_use, register |
| Pronunciation | pronunciation_target, intelligibility |

Reading is not a seventh global mastery skill. Reading tasks may emit item-facet evidence to Vocabulary and/or Grammar according to the objective. The optional Level Test may report a separate assessment_domain=reading subscore; that subscore is assessment-only and is not persisted as skill_mastery_states.

## Canonical identity and version contract

| Field | Type | Example | Rule |
|---|---|---|---|
| id | UUID | 018f... | Opaque database/API identity. |
| stable_code | string | E-A1-M01-L01 | Immutable human-readable semantic code; never stored in *_id. |
| version_code | string | 1.4 / 2026-09-05.1 | Immutable revision label for a versioned entity. |
| provider_external_id | string nullable | vendor-model-x | External/provider identifier only in adapter/config boundary. |

API/JSON examples MUST use UUID-shaped values in *_id fields. Content manifests MAY use stable_code for authoring references, but the build/publish step resolves them to UUID + version_code and rejects unresolved codes.

## Canonical pronunciation state and asynchronous speech-job contract

| State | Meaning | Completion / evidence / Auto-advance |
|---|---|---|
| speech_correct | Usable, sufficiently confident target-feature match | Positive bounded Pronunciation evidence. Auto-advance allowed after feedback dwell if setting ON; otherwise show “Далі”. |
| speech_incorrect | Usable, sufficiently confident mismatch | Bounded negative/practice-needed evidence only for targeted pronunciation facet. Non-blocking. Auto-advance may proceed after feedback dwell if setting ON; otherwise show Retry + Continue. Never counts as success. |
| speech_unavailable | Mic denied/absent, timeout, low confidence, provider failure | No mastery update. Non-blocking. Auto-advance may proceed after neutral status dwell if setting ON; otherwise Retry + Continue. |

Canonical state names are speech_correct, speech_incorrect and speech_unavailable. Legacy labels speech_feedback_correct and speech_feedback_retry are invalid.

### speech_job lifecycle

created -> uploaded -> queued -> processing -> succeeded | unavailable | failed | cancelled | expired. POST /api/v1/speech/jobs with Idempotency-Key + attempt_id creates or returns the same owner/profile/item/content-bound job and returns job_id + single-use upload_url. PUT upload_url uploads encrypted transient audio; POST /api/v1/speech/jobs/{job_id}/submit queues scoring; GET /api/v1/speech/jobs/{job_id} returns owner-scoped status/result; POST /api/v1/speech/jobs/{job_id}/cancel idempotently settles speech_unavailable(reason=user_cancelled). Continue is the normal LessonPlayer Next action after a terminal speech outcome and creates no new attempt. succeeded maps exactly once to speech_correct/speech_incorrect using evidence_map; unavailable/failed/expired map exactly once to speech_unavailable after bounded retries. Network retries reuse attempt_id/idempotency/job; learner Retry after a terminal result creates a NEW attempt_id/job; signed late/duplicate callbacks after settlement are ignored; raw audio is deleted at terminal settlement/cancel or TTL <=15 minutes.

## Canonical execution authority and milestone map

| Milestone | Authority |
|---|---|
| P0 | Governance freeze, exact baseline, decision log, full MUST trace matrix |
| P1 | Monorepo/bootstrap/CI/config |
| P2 | Data, UUID/stable_code/version_code, language isolation, publication |
| P3 | Lesson Engine + attempts + deterministic state |
| P4 | Two-level Mastery + Review + mistakes + collections |
| P5 | Media/audio/speech + async speech jobs |
| P6 | English E-A1-M01 |
| P7 | Czech C-A1-M01 + bilingual isolation proof |
| P8 | Admin/CMS + publication + Admin AI Assist foundation |
| P9 | Optional learner AI + AI Auto allowlist |
| P10 | Onboarding/Home/Explore/Course/Progress/Profile/Settings/ notifications + persistence |
| P11 | Reference hardening + 32 scenarios + technical gates; freeze reference baseline |
| P12 | A1 M02-M12 controlled rollout + pilot/calibration + optional A1 Level Test |
| P13 | Full-system hardening/launch gate: security, privacy, performance, restore/DR, release provenance, legal/product readiness |

Only Lingvessa_Implementation_Plan v1.4 uses P0-P13 numbering. Any older P-number labels in other specifications are descriptive history and MUST be mapped to these milestones rather than treated as execution authority.

- Čeština pro cizince

OpenAPI here means the OpenAPI Specification for describing HTTP APIs; it is unrelated to OpenAI as an AI provider. OpenAI remains only a possible future provider behind the provider-agnostic AI adapter and is not required by the v1 baseline.

## Approval record

| Поле | Значення |
|---|---|
| Baseline status | OWNER-LOCKED IMPLEMENTATION BASELINE / P0 AUTHORIZED |
| Approval date | 10.09.2026 |
| Approver | Product owner |
| Candidate version | v1.6 |
| Accepted exceptions | None |
| Execution authority | Lingvessa_Implementation_Plan v1.4; P0 must be closed before P1. |

Canonical machine-readable source: /packages/activity-schemas/mastery-registry.json. CI MUST validate every evidence_map against the registry and eligible skill-facet pair matrix; copied tables in specifications are checksum-checked mirrors.

Pronunciation mastery requires usable learner audio evaluated against a declared pronunciation facet. Perceptual tasks such as identifying stress, sound or syllable position are Listening evidence (typically listening_recognition), not Pronunciation evidence.
